

177-piece project cargo movement from Vanderbijlpark, Gauteng to the Port of Loading in Richards Bay, KwaZulu-Natal where the cargo was loaded for its onward journey to Perth, Australia.

Expertly coordinated by UPF South Africa team, this operation involved the seamless handling of complex out-of-gauge and in-gauge cargo, including:

- Rotary shell — 28m (L) x 6m (W) x 5m (H)
- Muffle base — 24m (L) x 5.2m (W) x 3.1m (H)

From heavy lifts and stevedoring to port coordination and inventory management.
